Coursework: Web Design, Human Factors in Engineering, Global UX, UI Design, Agile Project Management, UX Research

PROFESSIONAL EXPERIENCE

PolyAI – New York, NY & London, UK (Remote) **April 2025 – September 2026**
Dialogue Designer / Agent Designer

- Design and implement fully automated voice AI agents for healthcare clients end-to-end, architecting complex multi-turn conversation flows and building custom Python solutions within PolyAI's Agent Studio.
- Own the full agent lifecycle from requirements through deployment, collaborating with cross-functional teams to deliver agents handling thousands of inbound calls while continuously refining performance based on real customer interaction data.

Warner Bros. Discovery (WB Games Boston) – Needham, MA (Remote) **2022**
UX Designer (Co-op) for Game of Thrones: Conquest

- Designed and prototyped game and webstore features in Figma, collaborating with cross-functional teams to deliver key improvements including a highly requested player feature, wireframe templates, and competitor analyses.

3Data – Austin, TX (Remote) **2019**
UX Design & Research Intern

- Designed and tested platform features, developed user personas, and created wireframes to improve UI and address user needs, while enhancing website content and supporting project timelines for streamlined team progress.
